

# Adding with 8

Imagine that 8 wants to be a 10! It takes two from the other number (from 3). So, 8 becomes 10, and only 1 is left over.

$$8 + 3 = 10 + 1 = 11$$

8 wants to be a 10! So, it takes two from the other number (from 5). So, 8 becomes 10, and 3 are left over.

$$8 + 5 = 10 + 3 = 13$$

Use the list on the right to practice. Don't write the answers there. Just point to different problems and say the answer aloud.

1. Add. First, circle the ten.

 <b>a.</b> $8 + 5$ $10 + 3 = \underline{\quad}$	 <b>b.</b> $8 + 4$ $10 + \underline{\quad} = \underline{\quad}$	 <b>c.</b> $8 + \underline{\quad}$ $10 + \underline{\quad} =$
 <b>d.</b> $8 + \underline{\quad} =$ $10 + \underline{\quad} = \underline{\quad}$	 <b>e.</b> $8 + \underline{\quad} =$ $10 + \underline{\quad} = \underline{\quad}$	 <b>f.</b> $8 + \underline{\quad} =$ $10 + \underline{\quad} = \underline{\quad}$

$8 + 1 = \square$   
 $8 + 2 = \square$   
 $8 + 3 = \square$   
 $8 + 4 = \square$   
 $8 + 5 = \square$   
 $8 + 6 = \square$   
 $8 + 7 = \square$   
 $8 + 8 = \square$   
 $8 + 9 = \square$

2. It is good to memorize the doubles, also. Fill in.

$2 + 2 = \underline{\quad}$	$5 + 5 = \underline{\quad}$	$8 + 8 = \underline{\quad}$
$3 + 3 = \underline{\quad}$	$6 + 6 = \underline{\quad}$	$9 + 9 = \underline{\quad}$
$4 + 4 = \underline{\quad}$	$7 + 7 = \underline{\quad}$	$10 + 10 = \underline{\quad}$
