Subtraction Word Problems A4

Jasmine and her mom went to the grocery to buy some food. Her mom gave her $100.00 to spend.

1. Since she loves fruits, she went to the fruits section first. There she bought apples and oranges worth $15.00. From the original $100.00 given by her mom, how much money was left for her to spend?

2. Using what was left from buying fruits, she decided to buy some cookies. If she spent $16.00 on cookies, how much money was left with her?

3. Her friends are coming over the next day so she also bought some refreshments. If she has $50.00 left from the money she had after buying cookies, how much did she spend on juice?

4. Jasmine also bought some chips for her friends in which she got for a discount of $17.00. If the chips originally cost $35.00, how much did she actually spend on chips?

5. When she came back to her mother, she returned $27.00 worth of change. From the initial $100.00 that her mom gave her, how much money in total did she spend on buying groceries?
Jasmine and her mom went to the grocery to buy some food. Her mom gave her $100.00 to spend.

1. Since she loves fruits, she went to the fruits section first. There she bought apples and oranges worth $15.00. From the original $100.00 given by her mom, how much money was left for her to spend?
   Answer: $100.00 – $15.00 = $85.00
   $85.00 was left for Jasmine to spend.

2. Using what was left from buying fruits, she decided to buy some cookies. If she spent $16.00 on cookies, how much money was left with her?
   Answer: $85.00 – $16.00 = $69.00
   There were $69.00 left with her.

3. Her friends are coming over the next day so she also bought some refreshments. If she has $50.00 left from the money she had after buying cookies, how much did she spend on juice?
   Answer: $69.00 – $50.00 = $19.00
   She spent $19.00 on juice.

4. Jasmine also bought some chips for her friends in which she got for a discount of $17.00. If the chips originally cost $35.00, how much did she actually spend on chips?
   Answer: $35.00 – $17.00 = $18.00
   She spent $18.00 on chips after the discount.

5. When she came back to her mother, she returned $27.00 worth of change. From the initial $100.00 that her mom gave her, how much money in total did she spend on buying groceries?
   Answer: $100.00 – $27.00 = $73.00
   She spent $73.00 on buying groceries.
