

## Review: Completing the Next Whole Ten

1. Write the previous and next **whole ten**. Then, circle the ten that is nearer the given number.

|                     |                     |                     |
|---------------------|---------------------|---------------------|
| a. _____, 56, _____ | b. _____, 72, _____ | c. _____, 94, _____ |
| d. _____, 37, _____ | e. _____, 25, _____ | f. _____, 31, _____ |

52 and how many more makes the next ten (60)? We can write  $52 + \underline{\quad} = 60$ .

You can solve it using a *helping* problem: 2 and how many more makes ten?

The answer to both problems is the same. It is 8.

2. Complete the next ten. Below, write a helping problem using numbers within 0-10.

|  |  |  |
|--|--|--|
| a. $17 + \underline{\quad} = 20$<br>$7 + \underline{\quad} = 10$ | b. $62 + \underline{\quad} = \underline{\quad}$<br>$2 + \underline{\quad} = \underline{\quad}$ | c. $94 + \underline{\quad} = \underline{\quad}$<br>$4 + \underline{\quad} = \underline{\quad}$ |
|--|--|--|

3. Complete the next ten. Think of the helping problem that uses numbers within 0-10.

|   |   |   |
|---|---|---|
| a. $42 + \underline{\quad} = 50$                | b. $34 + \underline{\quad} = \underline{\quad}$ | c. $66 + \underline{\quad} = \underline{\quad}$ |
| d. $61 + \underline{\quad} = \underline{\quad}$ | e. $97 + \underline{\quad} = \underline{\quad}$ | f. $83 + \underline{\quad} = \underline{\quad}$ |

4. Circle the even numbers. 8 9 12 15 10 19 11 6 17

5. Now pick the even numbers from the previous exercise, and write each of them as a double of some number.

|                          |                          |
|--------------------------|--------------------------|
| a. _____ = _____ + _____ | b. _____ = _____ + _____ |
| c. _____ = _____ + _____ | d. _____ = _____ + _____ |
