

## Mental Maths and Money Problems

<p>You can add money amounts in your mind, as well.</p> <p>Add the euros and the cents separately.</p>	$\begin{aligned} &\underline{\text{€}1.20} + \underline{\text{€}1.50} \\ &= \underline{\text{€}2.70} \end{aligned}$	$\begin{aligned} &\underline{\text{€}0.14} + \underline{\text{€}1.20} \\ &= \underline{\text{€}1.34} \end{aligned}$
<p>If you get more than 100 cents, then those make another euro.</p>	$\begin{aligned} &\text{€}0.70 + \text{€}0.70 \\ &= 140 \text{ cents} = \underline{\text{€}1.40} \end{aligned}$	$\begin{aligned} &\text{€}0.99 + \text{€}0.06 \\ &= 105 \text{ cents} = \underline{\text{€}1.05} \end{aligned}$

1. Find the total cost of buying the things listed. Add mentally if you can.

 €3.10	 €1.00	 €1.50	 €0.80	 €0.50
 €1.90	 €0.55	 €2.20	 €20	 €35
<b>a.</b> scissors and pencils	<b>b.</b> pen and glue	<b>c.</b> crayons, glue, and pencils
