

Multiplication

Grade 2 Word Problems Worksheet

Elliot had a busy day working at a coffee shop. The coffee shop has 6 tables, each with 4 seats.

1. How many seats are there in the coffee shop?

2. Two customers each ordered 4 cups of caramel macchiato. How many cups of caramel macchiato does Elliot need to prepare?

3. Elliot ordered 3 boxes of coffee beans and 2 boxes of creamer from the supplier. When the order arrived, he found that each box of coffee contained 6 packages. How many packages of coffee did he receive?

4. A cup of hot chocolate contains 3 scoops of cocoa powder and 2 tablespoons of sugar. How many scoops of cocoa powder will Elliot use to make 7 cups of hot chocolate?

5. Eliot cleared 3 tables for the next customers. On each table, there were 4 mugs and 5 plates. How many mugs did he clear from the tables?

6. Write the multiplication equation for this sentence: "Elliot works in the coffee shop for 5 hours every weekday. He worked for 25 hours last week."

Answers

1. $6 \times 4 = 24$
The coffee shop has 24 seats.
2. $2 \times 4 = 8$
Elliot has to prepare 8 cups of caramel macchiato.
3. $3 \times 6 = 18$
There are 18 packages of coffee.
4. $3 \times 7 = 21$
Elliot will use 21 scoops of cocoa powder.
5. $3 \times 4 = 12$
Elliot cleared 12 mugs from the tables.
6. $5 \times 5 = 25$
