

4. At the second stop, 16 passengers get on the bus and 7 got off. How many passengers were there on the bus?

5. There were 6 less passengers getting on at the third stop than the second stop. 3 passengers got off at the third stop. How many passengers were there on the bus after the 3rd stop?

6. Write the number sentence that fits this: “When the bus left the terminal at 6 o’clock, it had only 6 passengers. When the bus arrived at its last stop, it had 20 more passengers than when it started. The bus had 26 passengers at the final stop.”

Answers

1. $20 + 25 = 45$
There are 45 seats on the bus.
2. $45 - 6 = 39$
39 seats were available.
3. $12 + 6 = 18$
There were 18 passengers on the bus.
4. $18 + 16 - 7 = 27$
There were 27 passengers on the bus.
5. $27 + 16 - 6 - 3 = 34$
There were 34 passengers on the bus.
6. $6 + 20 = 26$
