Grade 2 Word Problems Worksheet

Henry accidentally broke his phone. He is going to the gadget store to buy a new one.

1. There were 76 customers in the gadget store. 63 of them bought an item and the rest of them inquired about different products. How many customers did not buy anything?
2. There were 53 touchscreen mobile phones and 18 keypad mobile phones in the gadget store. If 9 touchscreen cell phones were sold, how many touchscreen phones were left?
3. Before the gadget store opened, there were 42 chargers in stock. At the end of the day, the store owner checked, and there were 17 chargers left. How many chargers were sold on that day?

Answers

1. $76 - 63 = 13$
There were 13 customers who did not buy anything.
2. $53 - 9 = 44$
There were 44 touchscreen phones left in the store.
3. $42 - 17 = 25$
There were 25 chargers sold.
4. $51 - 3 = 48$
48 sets of earphones were not defective.
5. $64 - 21 = 43$
The black phone had 43 more keys than the white phone.
6. $63 - 4 = 59$
