

Mass word problems (ounces, pounds, grams, kilograms)

Grade 3 Word Problems Worksheet

1. Sean is 15 pounds heavier than his younger brother, Joe. If Joe is 129 pounds, what is Sean's weight?

2. A baby bunny weighs 7 ounces. How much does a litter of 11 bunnies weigh?

3. In the zoo, there are a female lion and a male lion. The male lion is 167 kg, and the female lion is 20 kg lighter than the male lion. How much does the female lion weigh?

4. A dolphin is fed 15 kg of fish in a day. If it is fed 3 times a day, how much fish was fed to the dolphin at each meal?

5. At the pet shop, a small pack of birdseeds is 8 grams, and a large pack of birdseeds is 12 grams. What is the total weight of 5 small packs and 2 large packs of birdseeds?

Answers

1. $129 + 15 = 144$
Sean's weight is 144 pounds.
2. $7 \times 11 = 77$
A litter of 11 bunnies weighs 77 ounces.
3. $167 - 20 = 147$
The female lion weighs 147 kg.
4. $15 \div 3 = 5$
The dolphin was fed 5 kg of fish each time.
5. $(5 \times 8) + (2 \times 12) = 40 + 24 = 64$
The total weight of 5 small packs and 2 large packs is 64 grams.
