

Dividing integers

Grade 5 Integers Worksheet

Rule:

The quotient of two numbers with same signs is a positive number.

The quotient of two numbers with different signs is a negative number.

$$-15 \overline{) -45}$$

$$-9 \overline{) 108}$$

$$2 \overline{) -214}$$

$$4 \overline{) -24}$$

$$11 \overline{) -198}$$

$$-5 \overline{) 185}$$

$$19 \overline{) 95}$$

$$-8 \overline{) -72}$$

$$-7 \overline{) 147}$$

$$-12 \overline{) 48}$$

$$-4 \overline{) -216}$$

$$-4 \overline{) -16}$$

$$2 \overline{) -88}$$

$$9 \overline{) -153}$$

$$-19 \overline{) -114}$$

$$1 \overline{) -196}$$

$$8 \overline{) -216}$$

$$10 \overline{) 210}$$

$$-10 \overline{) 130}$$

$$-12 \overline{) -216}$$

Dividing integers

Grade 5 Integers Worksheet

Answers:

$$\begin{array}{r} 3 \\ -15 \overline{) -45} \end{array}$$

$$\begin{array}{r} -12 \\ -9 \overline{) 108} \end{array}$$

$$\begin{array}{r} -107 \\ 2 \overline{) -214} \end{array}$$

$$\begin{array}{r} -6 \\ 4 \overline{) -24} \end{array}$$

$$\begin{array}{r} -18 \\ 11 \overline{) -198} \end{array}$$

$$\begin{array}{r} -37 \\ -5 \overline{) 185} \end{array}$$

$$\begin{array}{r} 5 \\ 19 \overline{) 95} \end{array}$$

$$\begin{array}{r} 9 \\ -8 \overline{) -72} \end{array}$$

$$\begin{array}{r} -21 \\ -7 \overline{) 147} \end{array}$$

$$\begin{array}{r} -4 \\ -12 \overline{) 48} \end{array}$$

$$\begin{array}{r} 54 \\ -4 \overline{) -216} \end{array}$$

$$\begin{array}{r} 4 \\ -4 \overline{) -16} \end{array}$$

$$\begin{array}{r} -44 \\ 2 \overline{) -88} \end{array}$$

$$\begin{array}{r} -17 \\ 9 \overline{) -153} \end{array}$$

$$\begin{array}{r} 6 \\ -19 \overline{) -114} \end{array}$$

$$\begin{array}{r} -196 \\ 1 \overline{) -196} \end{array}$$

$$\begin{array}{r} -27 \\ 8 \overline{) -216} \end{array}$$

$$\begin{array}{r} 21 \\ 10 \overline{) 210} \end{array}$$

$$\begin{array}{r} -13 \\ -10 \overline{) 130} \end{array}$$

$$\begin{array}{r} 18 \\ -12 \overline{) -216} \end{array}$$
