

## Dividing integers

---

### Grade 5 Integers Worksheet

Rule:

The quotient of two numbers with same signs is a positive number.

The quotient of two numbers with different signs is a negative number.

$$-9 \overline{) -144}$$

$$14 \overline{) 126}$$

$$6 \overline{) -102}$$

$$-9 \overline{) 162}$$

$$-14 \overline{) -168}$$

$$-10 \overline{) -80}$$

$$5 \overline{) 40}$$

$$20 \overline{) -240}$$

$$-7 \overline{) 77}$$

$$22 \overline{) 198}$$

$$9 \overline{) -54}$$

$$-18 \overline{) -54}$$

$$-5 \overline{) 90}$$

$$-25 \overline{) -75}$$

$$4 \overline{) -24}$$

$$2 \overline{) 164}$$

$$-13 \overline{) -104}$$

$$12 \overline{) -216}$$

$$4 \overline{) 64}$$

$$7 \overline{) -175}$$

### Grade 5 Integers Worksheet

Answers:

$$\begin{array}{r} 16 \\ -9 \overline{) -144} \end{array}$$

$$\begin{array}{r} 9 \\ 14 \overline{) 126} \end{array}$$

$$\begin{array}{r} -17 \\ 6 \overline{) -102} \end{array}$$

$$\begin{array}{r} -18 \\ -9 \overline{) 162} \end{array}$$

$$\begin{array}{r} 12 \\ -14 \overline{) -168} \end{array}$$

$$\begin{array}{r} 8 \\ -10 \overline{) -80} \end{array}$$

$$\begin{array}{r} 8 \\ 5 \overline{) 40} \end{array}$$

$$\begin{array}{r} -12 \\ 20 \overline{) -240} \end{array}$$

$$\begin{array}{r} -11 \\ -7 \overline{) 77} \end{array}$$

$$\begin{array}{r} 9 \\ 22 \overline{) 198} \end{array}$$

$$\begin{array}{r} -6 \\ 9 \overline{) -54} \end{array}$$

$$\begin{array}{r} 3 \\ -18 \overline{) -54} \end{array}$$

$$\begin{array}{r} -18 \\ -5 \overline{) 90} \end{array}$$

$$\begin{array}{r} 3 \\ -25 \overline{) -75} \end{array}$$

$$\begin{array}{r} -6 \\ 4 \overline{) -24} \end{array}$$

$$\begin{array}{r} 82 \\ 2 \overline{) 164} \end{array}$$

$$\begin{array}{r} 8 \\ -13 \overline{) -104} \end{array}$$

$$\begin{array}{r} -18 \\ 12 \overline{) -216} \end{array}$$

$$\begin{array}{r} 16 \\ 4 \overline{) 64} \end{array}$$

$$\begin{array}{r} -25 \\ 7 \overline{) -175} \end{array}$$
