Subtracting mixed numbers (like denominators)

Grade 5 Fractions Worksheet

Find the difference.

1. $\frac{47}{20} - 2\frac{16}{20} = \phantom{0000}$
2. $\frac{14}{16} - 2\frac{15}{16} = \phantom{0000}$

3. $\frac{53}{6} - 2\frac{4}{6} = \phantom{0000}$
4. $\frac{9}{11} - 2\frac{10}{11} = \phantom{0000}$

5. $6\frac{1}{2} - 1\frac{1}{2} = \phantom{0000}$
6. $9\frac{9}{25} - 2\frac{23}{25} = \phantom{0000}$

7. $\frac{474}{100} - 2\frac{93}{100} = \phantom{0000}$
8. $6\frac{1}{3} - 2\frac{2}{3} = \phantom{0000}$

9. $\frac{72}{5} - 2\frac{3}{5} = \phantom{0000}$
10. $2\frac{13}{15} - 2\frac{6}{15} = \phantom{0000}$

11. $9\frac{1}{10} - 1\frac{6}{10} = \phantom{0000}$
12. $\frac{99}{12} - 1\frac{11}{12} = \phantom{0000}$

13. $3\frac{2}{9} - 1\frac{6}{9} = \phantom{0000}$
14. $\frac{4}{7} - 2\frac{2}{7} = \phantom{0000}$

15. $8\frac{2}{4} - 2\frac{3}{4} = \phantom{0000}$
16. $4\frac{3}{8} - 2\frac{5}{8} = \phantom{0000}$
Subtracting mixed numbers (like denominators)

Grade 5 Fractions Worksheet

Find the difference.

1. \( \frac{7}{20} - \frac{16}{20} = \frac{11}{20} \)

2. \( \frac{14}{16} - \frac{15}{16} = \frac{15}{16} \)

3. \( \frac{3}{6} - \frac{4}{6} = \frac{5}{6} \)

4. \( \frac{9}{11} - \frac{10}{11} = \frac{10}{11} \)

5. \( \frac{1}{2} - \frac{1}{2} = 5 \)

6. \( \frac{9}{25} - \frac{23}{25} = \frac{11}{25} \)

7. \( \frac{74}{100} - \frac{93}{100} = \frac{81}{100} \)

8. \( \frac{1}{3} - \frac{2}{3} = \frac{2}{3} \)

9. \( \frac{2}{5} - \frac{3}{5} = 4 \frac{4}{5} \)

10. \( \frac{13}{15} - \frac{6}{15} = \frac{7}{15} \)

11. \( \frac{1}{10} - \frac{6}{10} = \frac{7}{2} \)

12. \( \frac{9}{12} - \frac{11}{12} = \frac{5}{6} \)

13. \( \frac{2}{9} - \frac{6}{9} = 1 \frac{5}{9} \)

14. \( \frac{4}{7} - \frac{2}{7} = \frac{2}{7} \)

15. \( \frac{2}{4} - \frac{3}{4} = \frac{3}{4} \)

16. \( \frac{3}{8} - \frac{5}{8} = 1 \frac{3}{4} \)
