

Multiplication word problems

Grade 3 Math Word Problems Worksheet

Dean went to the beach with his friends to enjoy the last weeks of summer.

1. When they got to the beach, they rented a house to stay in. If there are seven of them including Dean, and each paid \$70 for the rent, how much did they pay in total?
2. Dean knew that they are going to stay at the beach for a while, so he brought 30 dollars for every week of their stay. If Dean is staying for 4 weeks there, how much money did he bring?
3. After resting, they decided to go for a swim. Dan is 6 feet tall and weighs 150 pounds. If the depth of the water is 10 times Dean's height, how deep was the water?

Answers

1. $7 \times 70 = 490$
They paid a total of \$490 for the rent.
2. $30 \times 4 = 120$
Dean brought 120 dollars with him.
3. $6 \times 10 = 60$
The water was 60 feet deep.
4. $8 \times 40 = 320$
The ride would cost \$320.
5. $7 \times 90 = 630$
They spent a total of \$630.
